AJ Weeks

Stockholm, Sweden contact@ajweeks.com (+46) 724 06 47 97

Engineer with eight years of graphics programming, now working full-time on technical AI safety: ARENA alumnus, research team lead in the Heron AI Security Research Fellowship, and organizer of the Stockholm AI Safety community. I bring deep GPU and systems expertise and a high quality bar to interpretability and evaluation work.

Work Experience

Research Lead / Heron AI Security Research Fellowship
SEPT 2026–PRESENT, ONLINE
Leading a three month research project on fine-tuning open-weight LLMs to more accurately predict their future adherence to arbitrary policies.

Electronic Arts / Rendering Engineer
JAN 2024–MAY 2026, STOCKHOLM, SWEDEN
Maintained and improved surfel-based raytraced global illumination system shipped to millions of players. **Frostbite engine (C++, HLSL), Perforce, PIX**

Avalanche Studios Group / Experienced Graphics Programmer
JAN 2022–DEC 2023, STOCKHOLM, SWEDEN
Improved raytraced global illumination and shadow systems, engine optimization of CPU & GPU workloads. **Apex engine (C++, HLSL), Perforce, PIX**

Electric Square / Programmer
FEB 2018–DEC 2021, BRIGHTON, ENGLAND
Internship followed by full time employment as a generalist programmer. **Unity (C#), Unreal Engine 4 (C++, HLSL, Blueprints), Perforce**

Projects

Machine Learning Workshop 2025
Created and led a workshop for 40+ colleagues covering theory and application of ML basics (MNIST digit recognition & real-time image denoiser/upscaler).

Realtime Global Illumination Research 2019–2021
Co-author of unpublished research paper describing novel, scalable, & dynamic global illumination technique. Also responsible for implementation in production.

Flex Engine 2017–2023
Custom game engine (C++, Vulkan). Physically-based renderer supporting advanced features, a physics solver, audio engine, UI renderer, and much more (GitHub).

Education

ARENA 8.0 – Participant / In-person at LISA — JUNE 2026, LONDON
5-week program covering transformers, interpretability, fine-tuning, RL, and evals. In Other Words, 5-day project on influence of prompt variation on alignment evals.

Technical AI Safety Course – Participant / BlueDot Impact — MAY 2026, ONLINE
6-day course: training, evals, interp, & risk management in daily group discussions.

ML4Good – Teaching Assistant / AI Safety bootcamp — MARCH 2025, FRANCE
Gave lectures on transformer architecture, alignment techniques, and more.

ML4Good – Participant / AI Safety bootcamp — JUNE 2024, FRANCE
10-day bootcamp covering LLM internals, training methods, AI safety strategy, etc.

BSc Digital Arts and Entertainment / Howest University — 2015–2018, BELGIUM
Programming-focused game development. Graduated Magna Cum Laude.
